

ar FleetPro – Fleet Management Dashboard

React.js Web Application

Modern, responsive dashboard built on React.js for real-time fleet visibility

Centralized Fleet Monitoring

Single pane of glass for all vehicle status, fuel, and maintenance data

Dashboard-based Decision Support

KPIs, alerts, and analytics surfaced to fleet managers at a glance

Vehicle Status & Monitoring

Fleet KPI Summary

50

Total Vehicles

32

Active

12

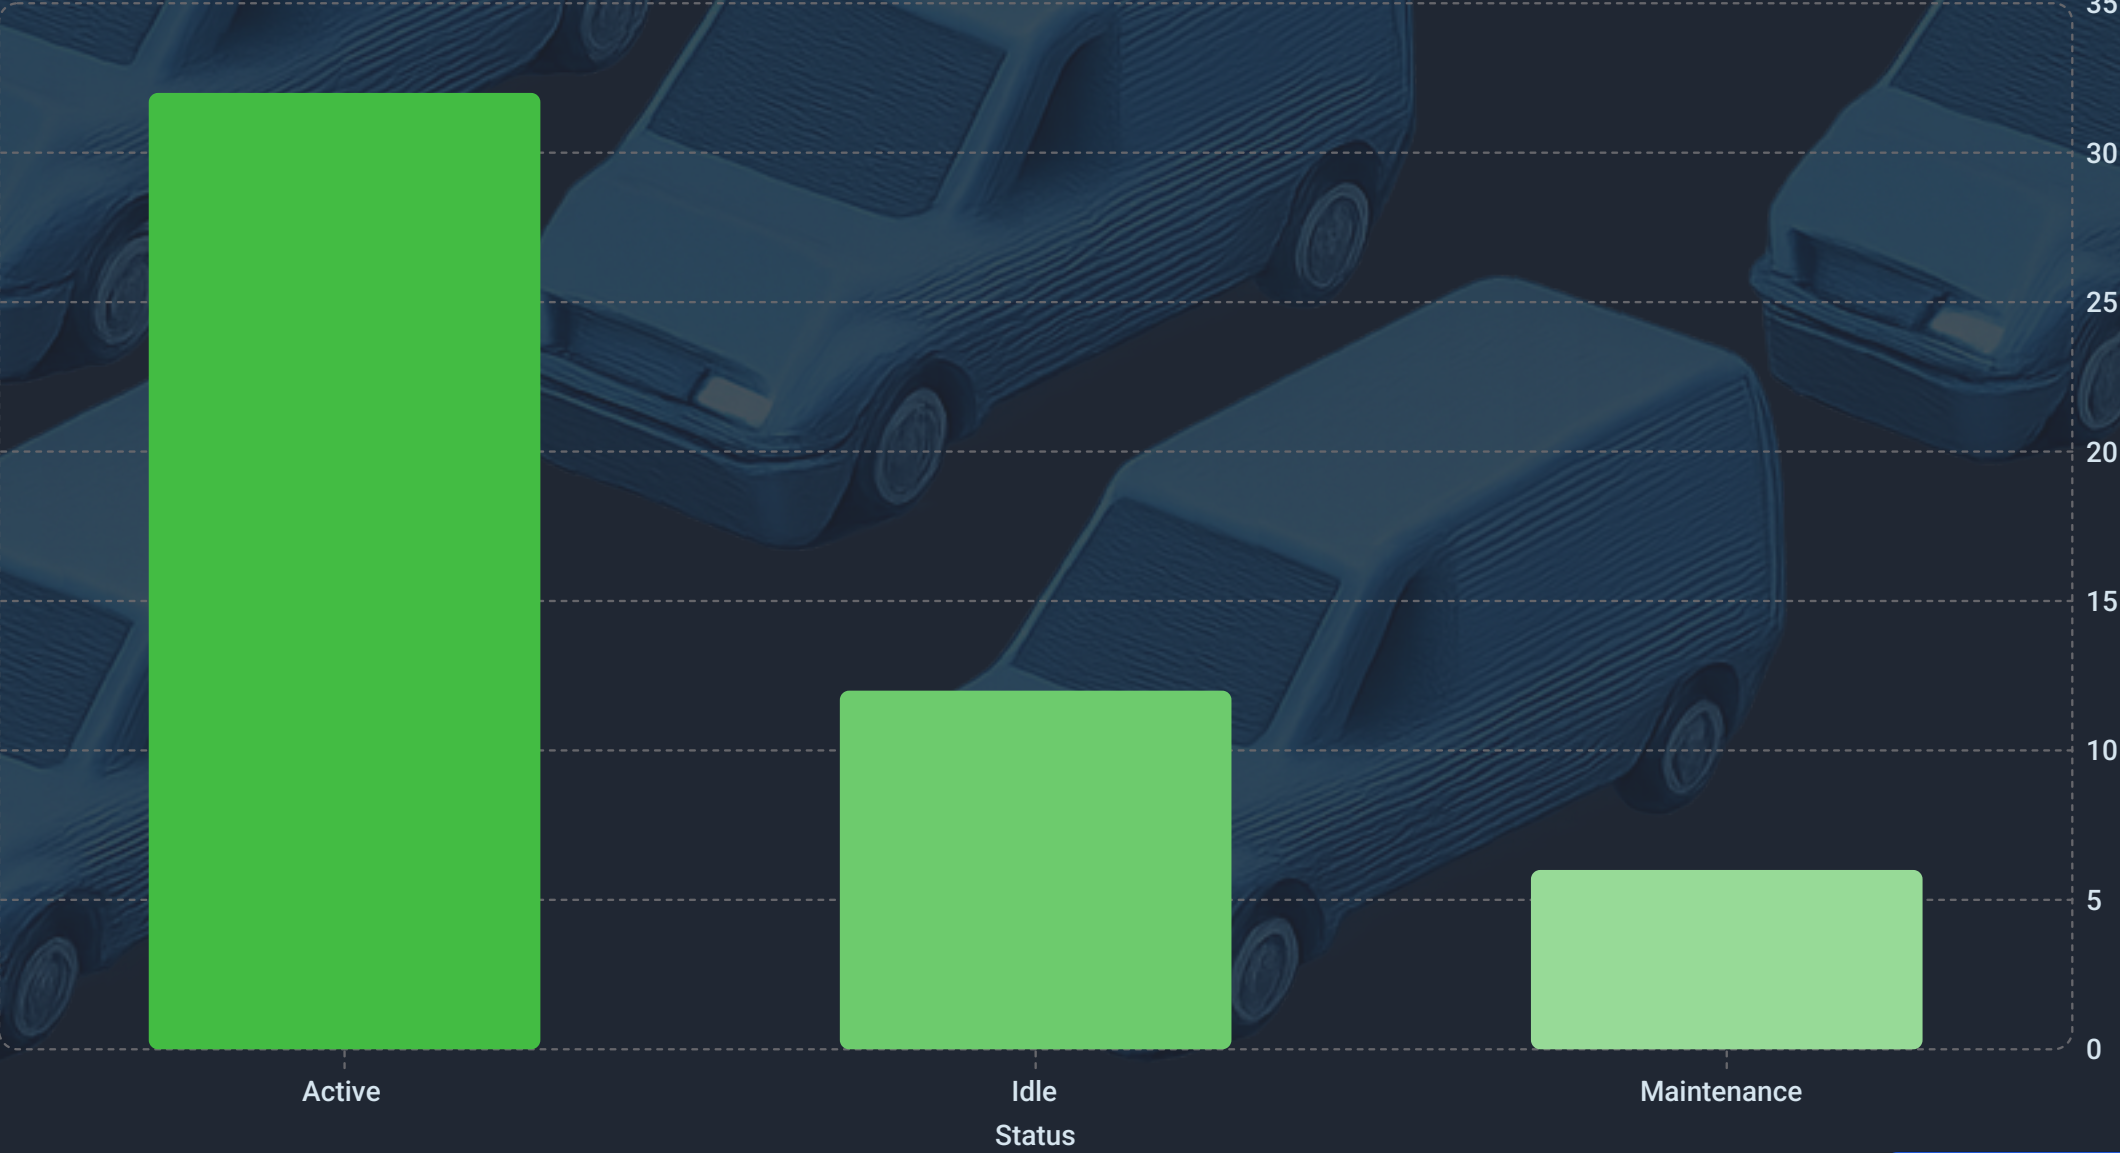

Idle

6

Maintenance

Vehicle Data

Vehicle	Type	Status	Fuel Level
TN-01	Truck	Active	82%
TN-02	Van	Idle	54%
TN-03	Bus	Maintenance	35%
TN-04	Truck	Active	91%

Trip & Fuel Management

Trip Management

Route Information

Origin, destination, and planned path for each trip assignment

Vehicle Assignment

Direct mapping of vehicles to active trips for accountability

Distance Tracking

Real-time odometer and distance-per-trip logging

Trip Status

Live status updates from dispatch through completion

Fuel Analytics

10.8

km/L Avg Efficiency

→ Weekly Fuel Performance

Trend tracking across rolling 7-day windows

→ Vehicle-wise Fuel Level

Per-vehicle fuel status visible on the dashboard

→ Fuel Efficiency Monitoring

Continuous km/L benchmarking per vehicle and fleet-wide

Consumption logging and refuels

Efficiency

km/L performance output

Maintenance Management

Maintenance Alerts

● TN-03 — Service Overdue

Immediate attention required. Vehicle currently in Maintenance status and removed from active rotation.

● TN-07 — Service in 3 Days

Upcoming service window. Schedule proactively to avoid unplanned downtime.

● TN-12 — Maintenance Good

No action required. Vehicle cleared for continued active deployment.

⚠ TN-03's Maintenance status is an independent service alert. Its 35% fuel level is a separate data point and is not the cause of the maintenance flag.

Alert Flow

01

Vehicle Status

System continuously monitors each vehicle's operational state and service history

02

Maintenance Alert

Threshold breach triggers a color-coded alert — red for overdue, yellow for upcoming, green for clear

03

Manager Attention

Alert surfaces on the dashboard for immediate fleet manager review and action

Complete Dashboard Solution

FleetPro brings everything together — giving fleet managers a single view of vehicles, fuel, maintenance, and performance to monitor operations more efficiently.

Dashboard
Single view for fleet status

Trips
Track trip history

Vehicles
Manage vehicle profiles

Fuel Management
Monitor fuel usage

Business Benefits

Easy Fleet Monitoring

All vehicle statuses visible in one centralized dashboard view

Faster Maintenance Awareness

Color-coded alerts surface overdue and upcoming service needs instantly

Fuel Efficiency Visibility

Per-vehicle and fleet-wide km/L tracking drives cost accountability

Better Utilization Tracking

Vehicle-level utilization percentages highlight underperforming assets

Centralized Fleet Information

Single source of truth for all fleet data across vehicles, trips, and fuel

Simple Report Generation

On-demand reports for operations, compliance, and management review

"FleetPro is designed to give fleet managers a single view of vehicles, fuel, maintenance and performance, helping them monitor operations more efficiently."
