

FleetPro — Fleet Management Dashboard

Web-based dashboard for centralized monitoring and management of Trucks, Vans, and Buses. Designed for fast operational decisions and clear fleet visibility.

What FleetPro Does

Vehicle Management

Track Trucks, Vans, and Buses with status, fuel, speed, and location.

Trip Management

Manage routes and trip status (example trips: TR-101, TR-102, TR-103).

Fuel Management

Monitor efficiency (Average Fuel Efficiency: 10.8 km/L) and fuel cost indicators.

Maintenance & Live Operations

Complete workflow: Vehicles → Trips → Fuel → Maintenance
→ Analytics → Live Tracking → Predictions → Reports

Maintenance

Alerts with priorities: TN-03 — Overdue (High); TN-07 — Service in 3 days (Medium); TN-12 — Good (Low).

Live Tracking

Real-time location and speed for active vehicles — enables rapid response and routing decisions.

Analytics & KPIs

Key fleet metrics provide a quick health snapshot and guide priorities for operations and maintenance.

6

Total Vehicles

Mixed fleet: Trucks, Vans, Buses.

3

Active Vehicles

TN-01, TN-04, TN-05 (examples).

1

Maintenance

TN-03 — Overdue (High).

Sample Fleet Data

Vehicle	Type	Status	Fuel
TN-01	Truck	Active	82%
TN-02	Van	Idle	54%
TN-03	Bus	Maintenance	35%
TN-04	Truck	Active	91%

Technology & Business Fit

Future: Python ML for maintenance prediction;
GPS/Google Maps API or Leaflet.js for mapping;
telematics/sensor integration.

Business use cases: Transportation & Logistics, Delivery, Construction, Field Services, Public/Transit fleets, and commercial vehicle operations.

Frontend

React.js + Tailwind CSS,
Recharts/Chart.js for visualizations.

Backend

Node.js, Express.js, REST API.

Database

MongoDB for flexible fleet data
storage.

Conclusion & Thank You

Key Outcomes

Smarter Fleet Management • Better Vehicle Utilization • Improved Fuel Efficiency • Planned Maintenance • Data-Driven Decisions

THANK YOU
VehiPro – Fleet Management Dashboard
